

For a long time, I have been very concerned about the dangers of media consolidation. That's why when MoveOn contacted me about Sinclair Corporation's plan to air an anti-Kerry program so close to the election, I was outraged. Especially since it's clear that the decision to air the program was not made by each individual station but rather handed down from the top. As I understand it, public broadcasting stations like Sinclair are required to serve the public interest, since they're using the airwaves for free. Please let them know that if they go through with this manipulative plan, you will enforce this rule firmly and quickly.
